

ABOLI AWATADE

Software Developer

aboliawatade0615@gmail.com — +91-9175676465

Profile Summary

Software Developer with 1.8+ years of experience in designing, developing, and maintaining web applications using C, ASP.NET Core, ASP.NET MVC, Web API, Angular, Entity Framework Core, and SQL Server. Skilled in developing RESTful APIs, implementing business logic, database integration, authentication and authorization, role-based access, and application validations. Experienced in debugging, troubleshooting, API integration, and delivering scalable and maintainable solutions using Agile/Scrum methodologies. Strong ability to collaborate with cross-functional teams, understand business requirements, and deliver reliable solutions throughout the software development lifecycle.

Technical Skills

Programming:	C#, Object-Oriented Programming (OOP), SOLID Principles, LINQ, Generics, Collections, Exception Handling
Backend:	ASP.NET Core, ASP.NET MVC, Web API, ADO.NET, Entity Framework Core
Frontend:	Angular, JavaScript, TypeScript, jQuery, AJAX, HTML5, CSS3, Bootstrap, Responsive UI
Database:	Microsoft SQL Server, Relational Database Design, Stored Procedures, Views, Joins, CTEs, Query Optimization
Tools:	Visual Studio, Visual Studio Code, Git, Postman, Swagger, SQL Server Management Studio (SSMS)

Professional Experience

Software Developer <i>Stark Technology & Staffing Solutions</i>	Feb 2025 – Present
---	---------------------------

Roles & Responsibilities

- Built web applications using C#, ASP.NET Core, ASP.NET MVC, Web API, Angular, and SQL Server across multiple business projects.
- Translated functional requirements into business logic, validation rules, UI components, API integrations, and database operations.
- Delivered RESTful APIs and connected frontend applications with backend services to support end-to-end business workflows.
- Refined SQL queries, stored procedures, and database operations for data processing and reporting.
- Secured application workflows through authentication, authorization, role-based access control, client-side and server-side validation, and exception handling.
- Developed reusable application components and optimized code, queries, and API operations to improve application performance, maintainability, and reliability.
- Collaborated with team members to analyze requirements, participate in code reviews, follow coding standards, and implement enhancements based on business needs.
- Participated in debugging, testing, defect resolution, Agile/Scrum ceremonies, code reviews, and maintenance activities.

Projects

STMindScope	<i>Team Lead</i>
--------------------	------------------

Technologies: C#, ASP.NET MVC, HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX, LINQ, ADO.NET, SQL Server

- Designed the expertise profile functionality for professional expertise information and related profile details.
- Configured test management features within the Expertise module for psychological test creation, configuration, and question management.

- Managed appointment management workflows covering appointment requests, scheduling, confirmation, rescheduling, cancellation, and related appointment operations to support smooth end-to-end appointment processing.
- Handled psychological test categories and coordinated review workflows for reviewing, approving, rejecting, and managing tests.
- Executed business rules, validation logic, and database operations through ADO.NET, LINQ, SQL Server, stored procedures, and SQL queries across Expertise and Admin modules.
- Guided module-level development activities and supported debugging, issue resolution, and functional enhancements.

STHarvestHolidays

Team Member

Technologies: C#, ASP.NET Core, Web API, Angular, Entity Framework Core, LINQ, SQL Server, Bootstrap

- Led the farmhouse registration feature for onboarding and maintaining farmhouse information within the Agrotourism Platform.
- Developed a 6-stage registration workflow covering farm information, rooms, documents, amenities, media, and final review.
- Enforced subscription-based eligibility rules to validate farmhouse registration against active subscription plans.
- Connected angular screens with ASP.NET Core Web APIs and database operations to support end-to-end registration workflows.
- Validated registration data through client-side and server-side validation for business rule compliance.
- Diagnosed UI, API, and database issues while configuring Entity Framework Core relationships through debugging and root-cause analysis.

STProcura

Team Member

Technologies: C#, ASP.NET MVC, HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX, LINQ, ADO.NET, SQL Server

- Controlled role and permission Management functionality for user access and module-level actions including Read, Insert, Update, Delete, and Export.
- Streamlined inventory management and material Requirement Planning workflows covering stock monitoring, refill planning, Just-in-Time requirements, approvals, and reorder-level notifications.
- Coordinated purchase requisition workflows alongside Supplier Quotation and Purchase Order processing, approvals, and procurement operations.
- Facilitated GRN, Quality Check, and Goods Return workflows for received materials, vendor and invoice details, material inspection, rejection status, and return processing.
- Managed procurement and inventory-related database operations and reporting through ADO.NET, LINQ, SQL Server, stored procedures, and SQL queries.
- Expanded reporting functionality with report search, date-range filtering, and data export for operational reporting.

STStaySmart

Team Member

Technologies: C#, WinForms, ADO.NET, SQL Server

- Supported the STStaySmart application for managing rooms, bookings, customers, employees, services, payments, and operational information.
- Produced room and booking Reports covering room availability, reservations, facilities, capacity, pricing, and room status.
- Documented customer and reservation Reports for customer registration details and room booking information.
- Organized Food, Inventory, Parking, Event, Activity, User, and Facility Reports for operational monitoring.
- Retrieved and processed business data through ADO.NET, SQL Server, and SQL queries for data storage, reporting, and operational activities.

Education

B.Sc(Computer Science)

Solapur University, Solapur
